

Packing & transport system

Supporting your logistics operations

Integrated with our electronic customs clearance solution, our packing & transport system supports you with the complete handling of your shipping orders.

You want to get in touch?

Use our
contact form

Efficient

Time and cost savings thanks to simplified processes and integrated plausibility check.

Independent

All courier, express and parcel service providers in one application. Standardised processes make it easier to use.

Essential

The data captured here is passed on to your system and forms the basis for further processing within your supply chain.

Future-proof

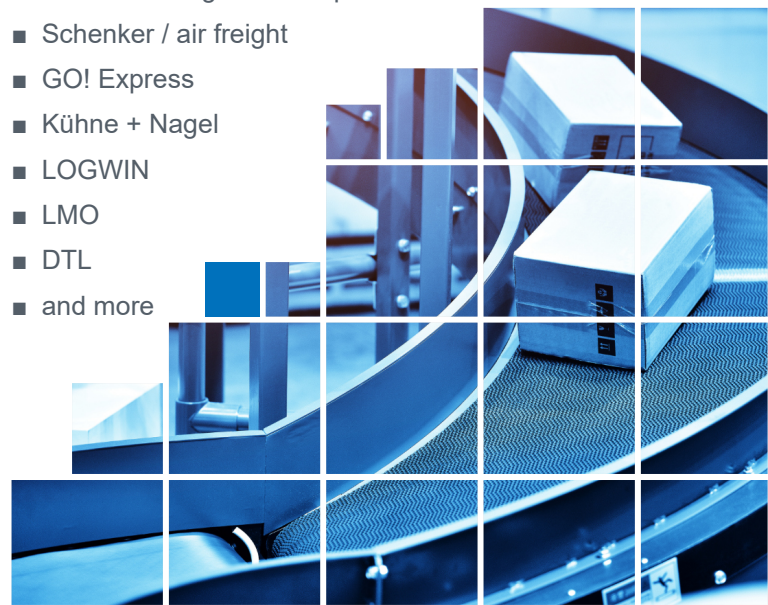

Updates and enhancements from service providers are incorporated into the software promptly, usually at no extra cost.

Functionality

- Supports the complete handling of your shipping orders.
- A modular structure with a wide range of application options enables flexible allocation of tasks between the shipping department and the packing station.
- Capture packing data and print shipping labels immediately at the packing station.
- Operated via handheld scanner or touchscreen, with the option to connect electronic scales for automatic weight transfer.
- Optional: assign items to individual packages, including picking quality assurance and creation of a packing list.
- Checks whether customs documents are required and automatically notifies those responsible for exports.
- Automatic calculation of freight costs, including data transfer to the upstream system – useful for statistics and reporting.
- Neutral freight forwarding package covering a wide range of carriers, including hanging garment shipments and label printing (without electronic data transfer).

Integrated courier, express and parcel service providers & freight forwarders

- DHL / DHL Paket International / DHL Europaket / DHL Kleinpaket / DHL Express Global / DHL Warenpost International
- UPS (including WorldEase and Access Point)
- FedEx
- GLS ShipIT
- MyDPD Business / DPD WebConnect
- TNTExpress

- DSV-Road / DSV XPress / DSV (UPS)
- Hellmann / Night Star Express
- Schenker / air freight
- GO! Express
- Kühne + Nagel
- LOGWIN
- LMO
- DTL
- and more

Why a packing & transport system matters for your business

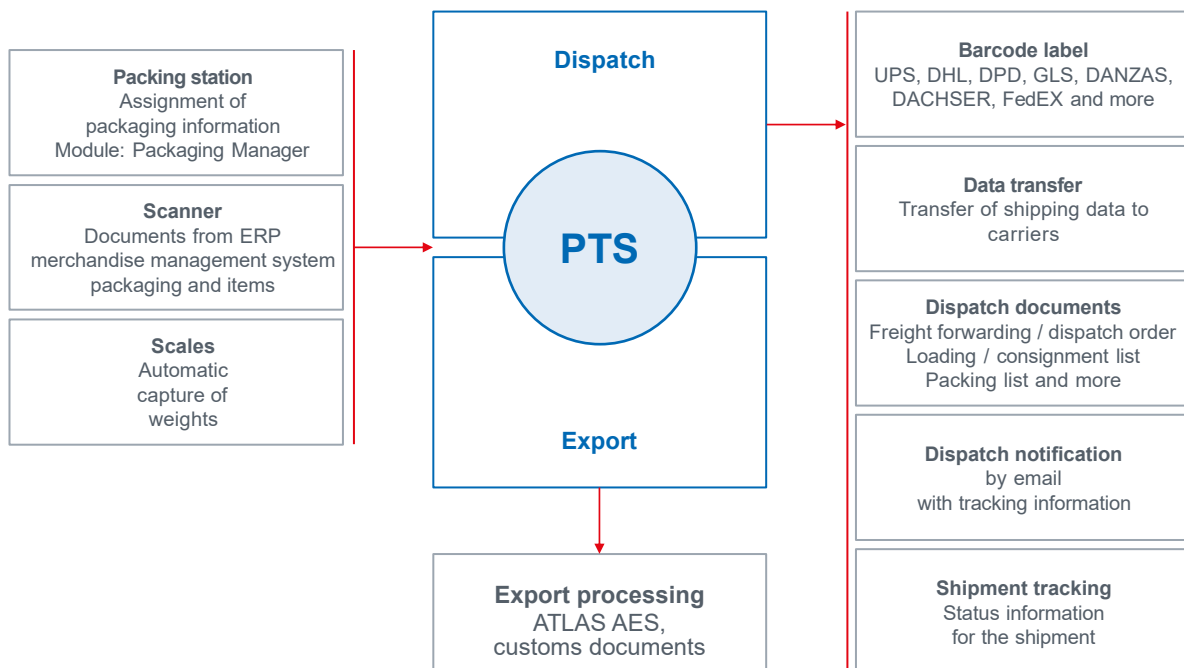

Anyone involved in shipping operations on a daily basis knows the challenge:

different processes, such as packing and dispatch, often have to be managed across multiple systems. Different workflows and the often problematic compatibility between individual systems quickly become an obstacle.

If you want to work efficiently and stay competitive, you need an intelligent solution.

How PTS works together with electronic customs clearance

Technical functionalities

- Interfaces for data transfer from ERP, PPS or merchandise management systems ensure smooth integration and can be flexibly adapted to existing IT environments
- PTS is based on our electronic customs clearance solution and is only available with the corresponding base module
- Shipment information can be transferred back to the upstream system and made available to other departments as well
- Flexible connection to various transport service providers and smooth data exchange
- Processing via black box, controlled through the interface

Company profile

Software solutions are our area of expertise – since 1988, FORMAT Software Service GmbH has been passionately dedicated to developing innovative solutions. Hosted and developed in Germany, our portfolio covers various areas of foreign trade, customs, and shipping management.

With a team of over 120 employees, FORMAT continues to drive innovation under the leadership of Horst Scharf. Our company is also a proud member of the Federal Association of Customs Software Manufacturers (BVZH).
