

We ensure complete transparency across your supply chains.

FORMAT-SCM: Supply chain management system

In most businesses, the supply chain plays a crucial role. Integrated, process-driven planning and control of goods, information, and financial flows along the entire value chain are essential prerequisites for minimising costs and optimising internal processes. Effective supply chain management enhances the success of any company – including yours.

Use the functions

FORMAT-SCM supports you in processing data from various systems and service providers.

The resulting transparent depiction of your supply chain offers insights into each individual step and allows for both manual and automated interventions. Moreover, this system is accessible irrespective of time, location, or device.

As a track & trace solution, FORMAT-SCM gives you a comprehensive overview of your consignments, enabling simple management, evaluation, and monitoring. This is pivotal when large volumes of shipments are dispatched via various transport service providers, as it is essential to know the current location of each consignment and when, with what contents, they are delivered.

Additionally, you can track compliance with delivery times and identify any delays. Invoices are automatically verified to ensure that no more than the agreed amount is paid.

You can easily set up notifications that are automatically sent upon specific status changes, thereby facilitating subsequent processes.

Furthermore, FORMAT-SCM guarantees the provision of data to other stakeholders in your supply chain, such as suppliers, manufacturers, service providers, and customs authorities. This also includes personalised consignment tracking services that you can offer your customers, ensuring the necessary transparency throughout your operations.

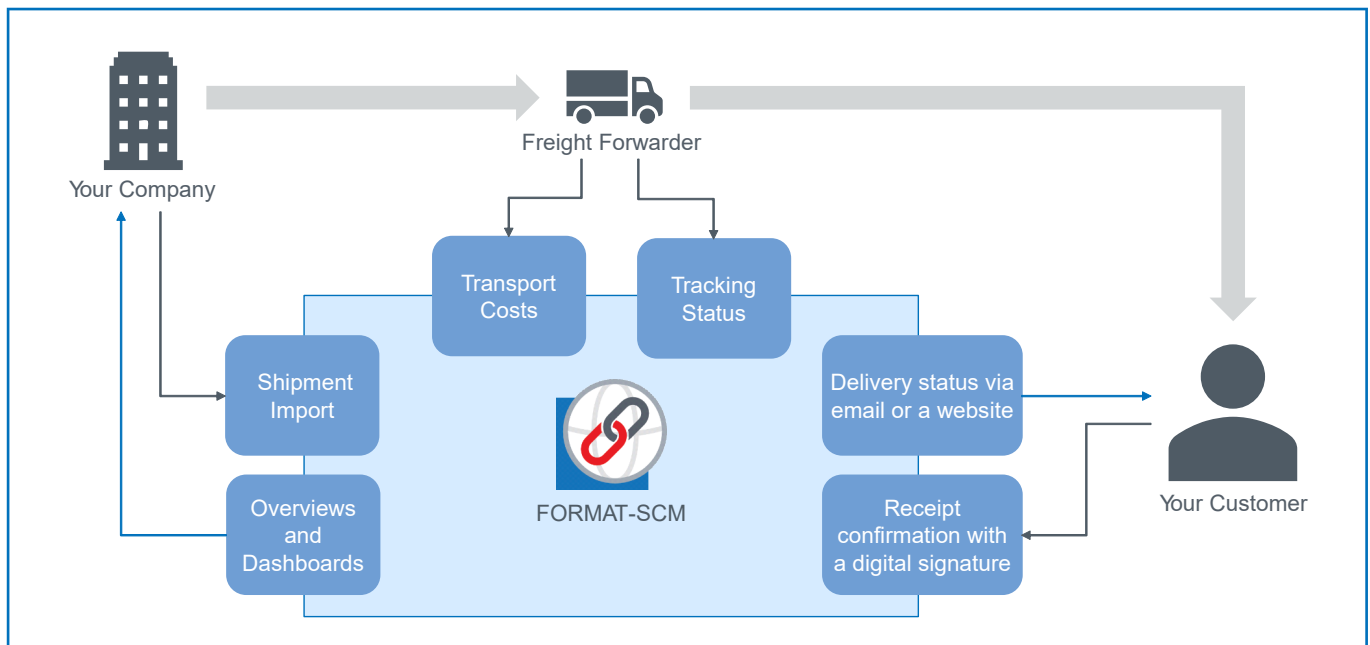

Secure the advantages

- **Controllable:** Visualisations and analyses through management dashboards, with the option to configure customised dashboards for reporting.
- **Adaptable:** With end-to-end process visibility of goods flows, you can actively intervene and optimise processes.
- **Transparent:** External supply chain participants can be seamlessly integrated, eliminating the need for manual data transfer..
- **All-In-One:** All transport service providers consolidated onto a single platform, with standardised shipment statuses enhancing traceability.

We ensure complete transparency across your supply chains.

FORMAT-SCM: Supply chain management system

Licence model (excerpt)

- Data centre solution (hosting) or on-premise (in-house)
- Monthly usage fee
- Number of shipments
- Number of forwarders / shipping providers
- Number of accounts
- Optional extensions

Technical functionalities

- Web application in HTML5
- Browser support (no plugins required): Chrome, Firefox, Safari, Edge
- Multilingual support (UTF-8) with a user-friendly language management system
- Service-oriented architecture (SOA), operable via XML interface
- Version history function (traceability of changes)
- Modular system
- Process visualisation

Company profile

Software solutions are our area of expertise – since 1988, FORMAT Software Service GmbH has been passionately dedicated to developing innovative solutions. Hosted and developed in Germany, our portfolio covers various areas of foreign trade, customs, and shipping management. A range of licensing models is available to suit different needs.

With a team of over 100 employees, FORMAT continues to drive innovation under the leadership of Horst Scharf. Our company is also a proud member of the Federal Association of Customs Software Manufacturers (BVZH).
